

AutoCAD APIs: Meet the Experts

Kean Walmsley, Autodesk
Davis Augustine, Autodesk
Lee Ambrosius, Autodesk
Cyrille Fauvel, Autodesk
Mads Paulin, Autodesk
Joel Petersen, Autodesk
Albert Szilvasy, Autodesk

SD5147 Release your inner geek. Straight from our AutoCAD Software Development Team, a panel of hardcore experts on ObjectARX technology, AutoCAD software, Microsoft .NET, and LISP are ready to answer your questions about the inner workings of AutoCAD software and its APIs. If you're writing plug-ins for AutoCAD software, then this is the perfect forum to get to know the people who create the APIs you work with and meet your fellow programmers who use those APIs. Come and ask questions, add your expertise to the discussion, or just listen and learn.

Learning Objectives

At the end of this class, you will be able to:

- Get to know your fellow AutoCAD software programmers and members of the AutoCAD Engineering Team

About the Speaker

Kean Walmsley has been with Autodesk, Inc., since 1995, working for most of that time for Autodesk Developer Network in a variety of roles and in a number of different countries. Kean's current role is software architect for the AutoCAD software family of products, and he continues to write regular posts for his popular development-oriented blog, Through the Interface. Kean currently lives and works in Switzerland.

The rest of the panel have deep(er) expertise in various areas related to the AutoCAD product and developing software to work with it. If these guys can't answer your question, then it's probably because you're in the wrong room.

kean.walmsley@autodesk.com

That's about it for this hand-out. It's very short, but then the value of the class is in the Q&A rather than the prepared remarks. If you'd like to see this class keep coming back, please don't mark us down on the survey feedback just because we lacked the foresight to answer your question in this document before you'd had the chance to ask it. ☺
