

Prep School: Prepare those Crazy Juvenile CAD Models for the Real World of Simulation

Tyler Henderson

Principal User Experience Designer

Twitter: @tyhender

Class summary

This class will be a live demonstration of how to use Autodesk SimStudio Tools to prepare CAD models for Simulation.

Key learning objectives

In this class you will:

- Learn some of the not-so-obvious capabilities in SimStudio Tools to become more efficient
- Learn how to identify and repair problem geometry in imported CAD Models
- Learn how to simplify complex geometry to enable quicker and more robust Simulation meshes
- Learn about round-tripping between SimStudio Tools and your Autodesk Simulation application for iterative workflows

Voice of Customer

Be Heard and Win!

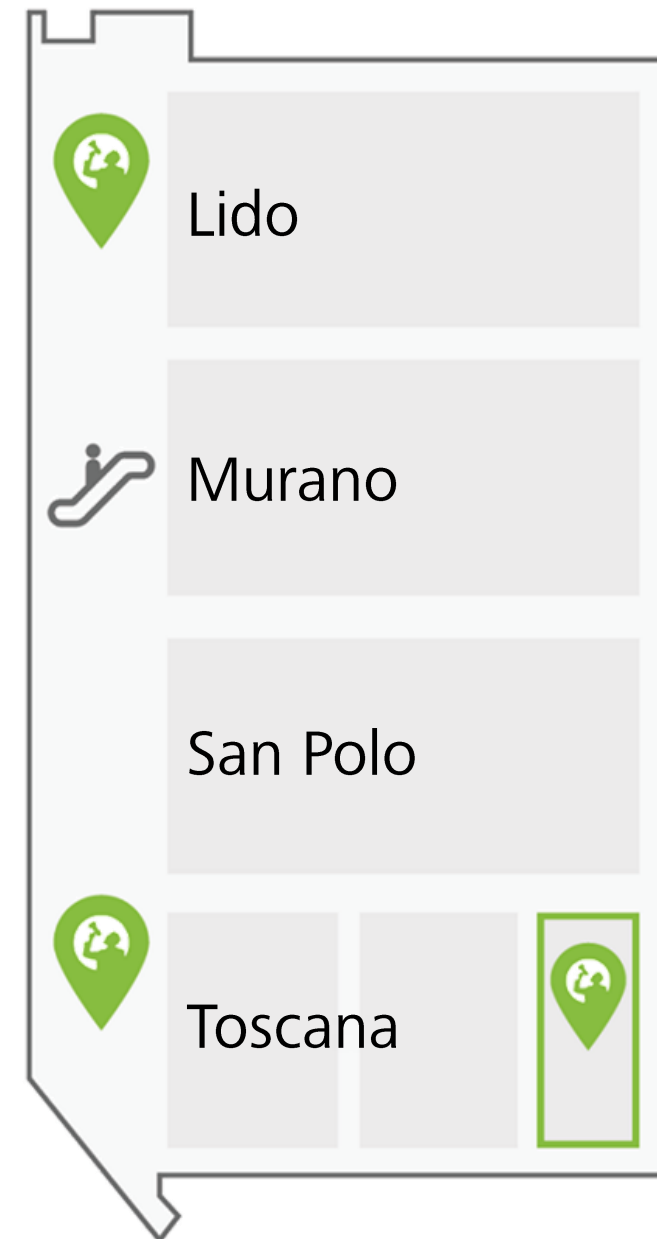

Help shape the future Autodesk experience...

9am – 6pm every day

...and maybe win a
GoPro camera!
