Cloud Adoption and its Impact on Roles and Responsibilities of Team Members

Ali C. Atabey
Autodesk Inc.

- Matthew Anderle, BIM Director, AECOM
- Matt Turner, BIM Technologist, SmithGroup
- Nick Burnett, Studio BIM Leader, NBBJ
- Elizabeth Angel, Senior Process Manager, Balfour Beatty US
- Richard Parker, Senior Product Line Manager, Autodesk

Learning Objectives

- Learn how industry leaders recognize changes, challenges, and opportunities within BIM360 Design and gain a first-hand impression of their journey
- Discover how to become a champion for cloud projects in your organization and understand the value it brings to a project team
- Get the inside scoop on how to setup a team for success in a BIM360 Design project
- Learn how the BIM360 platform improves team collaboration

Description

Our panelists will discuss their journey to BIM 360 platform adoption, talk about the opportunities and obstacles they faced along the way and what they experienced throughout the transition process.

Your Host

Ali Atabey is a Designated Support Specialist and a Subject Matter Expert. He works with major AEC companies as a technical advisor providing support, training, and guidance on BIM, Generative Design and BIM 360 Design products. Ali studied architecture at the University of Florida and practiced for over five years in Boston before joining Autodesk. He was a technology leader focusing on mixed-use, high-rise developments as well as healthcare and planned unit developments (PUDs). In his spare time, Ali is an aspiring sailor, drone pilot and snack enthusiast who enjoys adventuring around the world.
