An Introduction to Fusion 360 for Product Design Suite Subscribers

Daniel Graham
Autodesk

Bryce Heventhal
Autodesk

Learning Objectives

- Learn about Fusion 360
- Learn about how a customer is using Fusion 360
- Learn how to start using Fusion 360 as a subscription entitlement of Product Design Suite

Description

Fusion 360 software is available at no cost to all Product Design Suite 2015 software subscribers. The goal of this class is to explain what Fusion 360 software is, what is new, what is coming, and also to share how subscribers of Product Design Suite 2015 can take advantage of the software's functionality. Fusion 360 software is a cloud-based 3D CAD/CAM tool for product development that enables product teams and stakeholders to work together within an integrated design, engineering, and fabrication experience across platforms and devices. In this new way of working, users have the context to understand all aspects of a project and to collaborate with anyone and everyone, at any time. With Fusion 360 software, gone are the days of traditional data management and fragmented ways of working together on design projects.

Your AU Experts

Daniel Graham has spent the past 15 years in the engineering and design space focusing his passions around technology and design to help customers solve challenges. After graduating from engineering school and working for 3M in new product development, he spent 12 years working for SolidWorks Corp., most recently as a global account technical manager. Daniel joined Autodesk, Inc., in 2011 and is now a senior product manager on the Fusion 360 Team.

Bryce Heventhal is the Technical Marketing Manager for Fusion 360. He has 9+ years of CAD and FEA experience, with a B.S. in Mechanical Engineering. When he is not designing he is out rock climbing.
