

# Beyond the Software: Managing a BIM Adoption Successfully, The First Time

**BO2337-R**

Charlie Busa

Senior Business Consultant  
Autodesk Global Services

## Why we are here.

This is a facilitated discussion and the goal is for you to learn from each other

- All Points of View and Experiences are welcomed
- Your Contribution will make this the best session for all attendees
- Each topic discussion time will be brief but can resume after the session!

## Why we are here.

Open discussion will include the following elements:

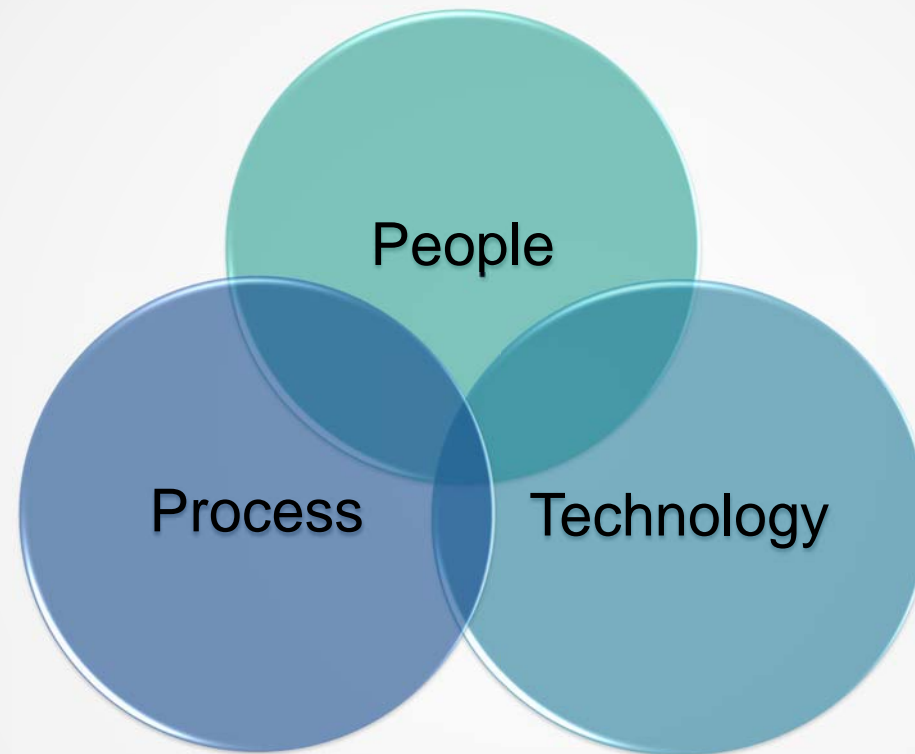

- Techniques that you have used for successfully completed implementation of BIM, those that are progressing on their implementation of BIM, and those that are just getting started.
- How the involvement of management, BIM education, and staff motivation have impacted implementations

# Learning Objectives

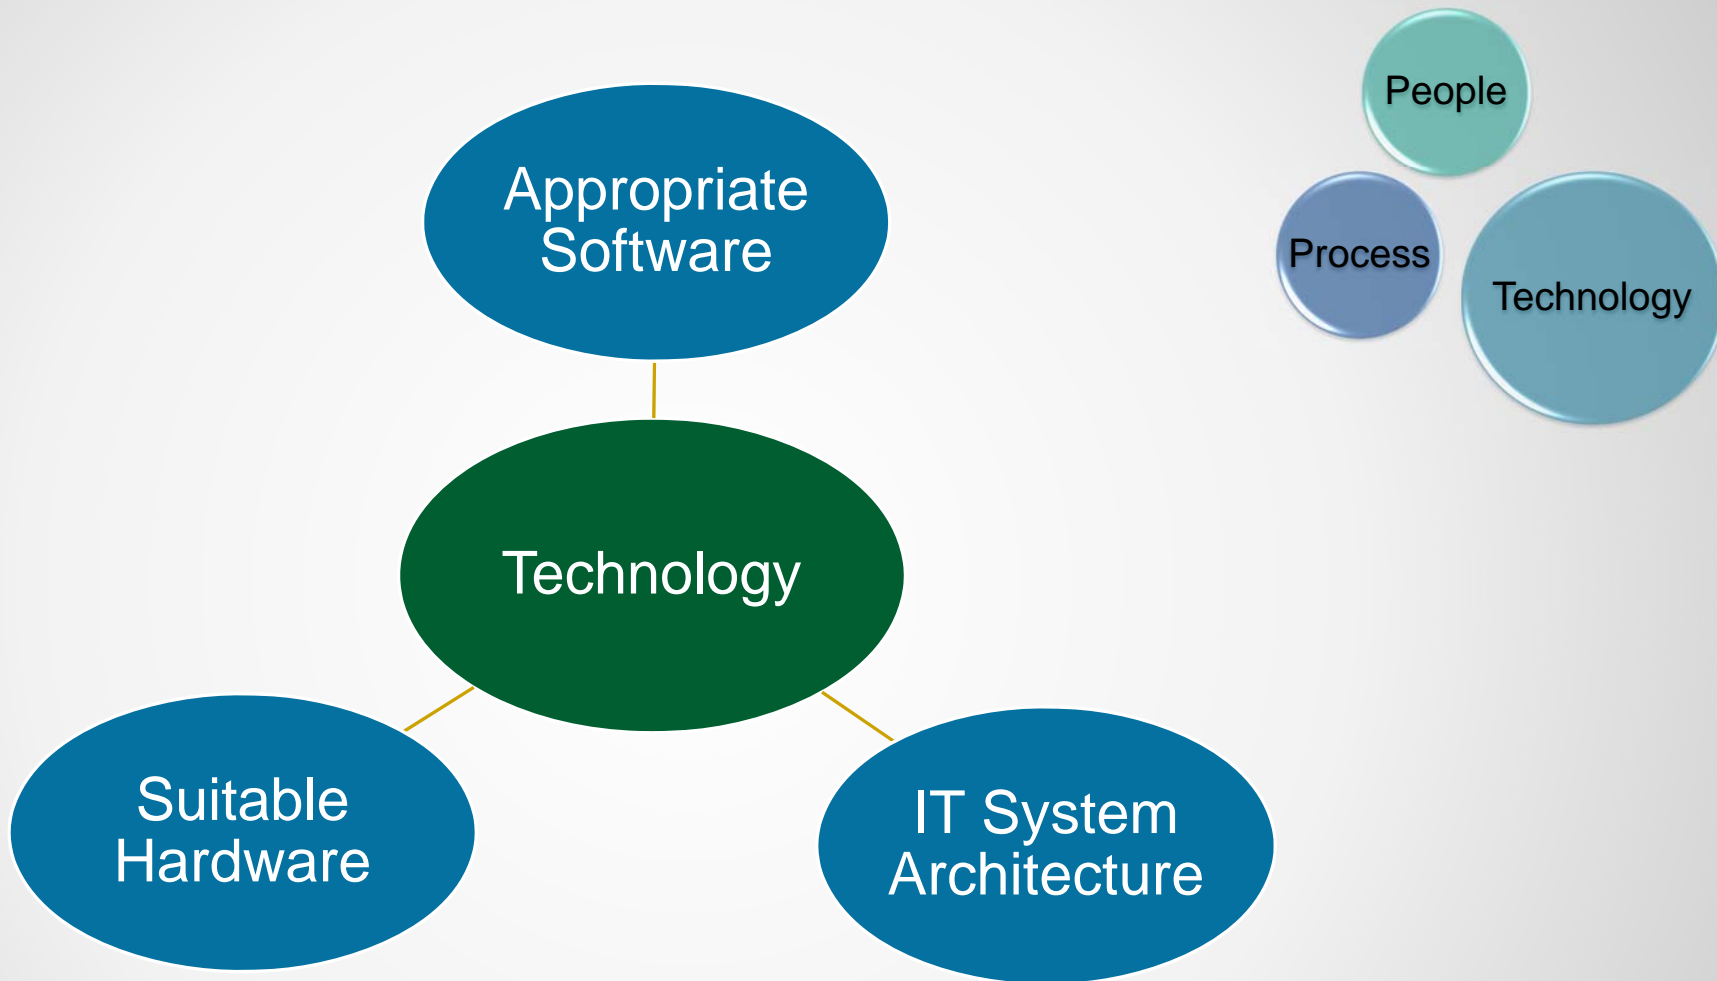

At the end of this class, you will:

- Understand the broader needs of a BIM Implementation
- Realize what management needs to do to ensure success
- Realize the impact of management involvement in a successful implementation
- Understand different implementation approaches

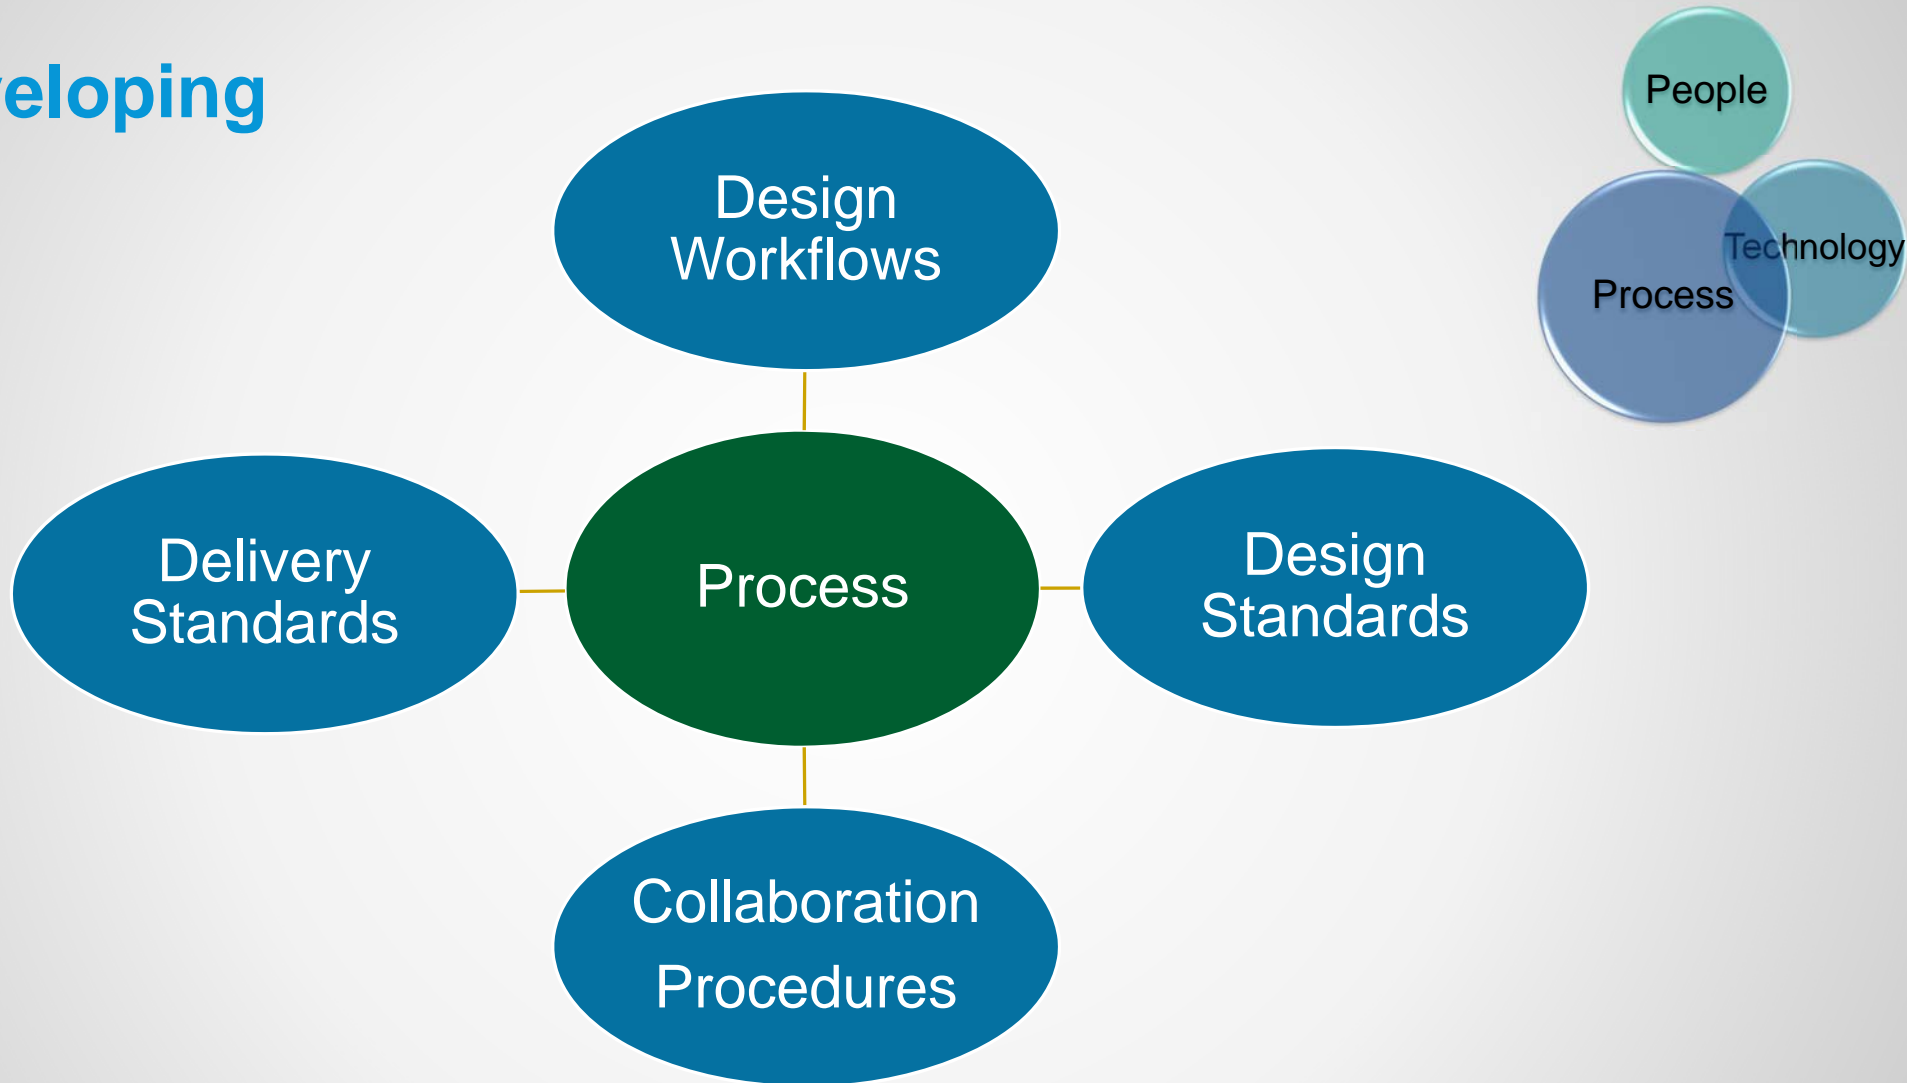

# The Components of BIM
